

## **Contacts: Conservation Applications of LiDAR**

Mark Tomer  
USDA-ARS, Ames, IA  
515- 294-0213  
mark.tomer@ars.usda.gov  
Soil scientist  
Terrain analysis

Ken Rojas  
USDA-NRCS, Information Technology Center, Natural Resources Research Center, Ft. Collins,  
CO  
970-492-7326  
Ken.rojas@ftc.usda.gov  
NRCS software development, senior project manager

Steven Nechero  
USDA-NRCS, Ft. Worth, TX  
817-509-3366 office, 817 825 2719 cell  
Steven.nechero@ftw.usda.gov  
Cartographer, Technology Applications Team Leader, Geographic Sciences Branch, National  
Cartography & Geospatial Center  
LiDAR acquisition and applications

Seth Dabney  
USDA-ARS, National Sedimentation Laboratory, Oxford, MS  
Soil scientist and research team leader  
662-232-2975  
seth.dabney@ars.usda.gov  
Development and support of RUSLE2

Dan Yoder  
University of Tennessee, Knoxville  
865-974-7116  
dyoder@utk.edu  
Works with Seth Dabney on development of RUSLE2

Tom Mueller  
Dept. Plant and Soil Science, University of Kentucky, Lexington  
859-257-8887  
mueller@uky.edu  
Designing variable width buffers, waterways with DEMs

David Mulla  
University of Minnesota, Dept. Soil, Water, and Climate  
Soil scientist  
612-625-6721  
mulla003@umn.edu  
Terrain analysis with LiDAR

Joseph Knight  
University of Minnesota, Dept. Forest Resources  
612-625-5354  
jknight@umn.edu  
Application of LiDAR to wetland mapping

Paul Bolstad  
University of Minnesota, Dept. Forest Resources  
612-624-9711  
pbolstad@umn.edu  
Application of LiDAR to forestry
